Positioning and Marketing your Company—Internal and External Customers

Employee Ownership

Management

Sid Scott, former VP-HR, Woodward Communications, Inc., Scott Consultants and Adjunct Instructor, University of Wisconsin

Introduction

- The purpose of our businesses
- What is Marketing?
- Exploring Brands & their promises
- Positioning your Brand
- Collaborating with your customers
- Developing "Value Propositions"
- Does employee ownership help?

Purpose of our businesses

- "The purpose of our business is to make money for the stockholders "
- In an employee-owned business, we are the shareholders.
- But, this definition leaves out a very important group, who are...?

Peter Drucker said it best:

"There is only one valid definition of business purpose:

to create **Customers**."

Customers a few more thoughts

- "Whenever I see new customers...I see \$10,000 burnt on their foreheads."
 - (Tom Monaghan, Dominos founder)
- "If we're not customer driven, our cars won't be either." (Ford Executive)
- "We don't have a Marketing Department; we have a Customer Department.
 - (Herb Kelleher, former CEO, Southwest Airlines)

L.L. Bean

- "The customer is the <u>most important</u> visitor on our premises.
- He (she) is <u>not</u> dependent on us, we are dependent on him (her).
- We are not doing him (her) a favor by serving him (her); <u>he (she)is doing us a favor</u> by giving us the opportunity to do so."

L.L. Bean credo

We get customers by:

- Identifying and locating prospects
- Selling to "first-time" prospects
- Keeping , growing new customers, and
- Keeping customers for life

Phillip Kotler, Kotler on Marketing

But...

The Marketing Quandary

 We spend 70% of our marketing budgets to attract new customers when 90% of revenue comes from current customers...

Oops-can we do better?

1985 definition of Marketing

 "Marketing is the process of planning and executing the conception, pricing, promotion, and distribution of goods, ideas, and services to create exchanges that satisfy individual and organizational goals."

Source: American Marketing Association

Marketing in the 21st Century

"Marketing is:

- the activity, set of institutions, and processes
- for creating, communicating, delivering, and exchanging offerings
- ✓ <u>that have value</u> for customers, clients, partners, and society at large.

Source: American Marketing Association, October 2007

Reasons why the <u>new Millennium</u> Marketing definition is better

 "Marketing is no longer a function – it is an an educational process."

Nancy Costopulos, Chief Marketing Officer of the American Marketing Association

- All organizational plans– *strategic, business, financial, etc.* <u>need a marketing dimension.</u>
- <u>Customer</u> relationships are <u>for life.</u>
 And, its <u>all</u> about <u>value</u>!

Kotler's observation

- "Marketing is <u>not</u> the art of finding clever ways to dispose of what you make. It is the art of <u>creating genuine customer value</u>."
- <u>What are the ways we create customer value</u> in the second decade of the 21st Century?

One definition of value

"Value is the satisfaction of customer requirements at the lowest possible cost of acquisition, ownership and use."

Louis J. De Rose, De Rose and Associates, Inc.

Traditional examples of adding value—some of these work

• Lower prices (Wal-Mart)

Lower prices + (Southwest Airlines)

Help the customer reduce his/her other business costs

U.S. Postal Service—"If it fits, it ships—for a low flat rate")

• Add benefits that make the offer more attractive to the customers

(FedEx: "When it absolutely, positively has to be there overnight.")

ARTES POSTA

UNITED

Walmar

More ways to create customer value

- It's a matter of perception-- worth the cost, e.g. BMW
 - Consistency of satisfaction, e.g.
 Zappos
- Product or service uniqueness; e.g. Apple I pad
- It meets needs, e. g. Facebook
- We helped create it, e. g. Priority Club Select VISA

Co-Creation with Customers

 "In today's participatory culture, customers want meaningful relationships with the brands they care about. Innovative companies are rising to the challenge, realizing that <u>customer</u> <u>collaboration is vital</u> to keeping a competitive edge."

> Jeffry Grau E-marketer Digital Intelligence

Not so breaking news: the marketplace is getting tougher...

Employee Ownership Management

Marketing, Selling in 2011 & beyond

- We have an <u>oversupplied economy</u>
- <u>More sales</u> are being done <u>over the Web</u>
- Buyers are more <u>sophisticated & busy</u>
- People buy based on their goals (needs)—<u>not</u> yours
- Customers care about <u>value to them</u>
- Business people have to be <u>intelligent</u> <u>listeners</u>
- Marketing & Sales people <u>need to align with</u> customers' priorities

Chuck West, University of Wisconsin Executive Education

Employee Ownership Management

Understanding brands.

• The test:

- "An orange is an orange unless that orange happens to be _____"
- "A banana is a banana unless that banana happens to be ""
- **"Catsup** is catsup unless it is

"

The most well-known brands

 Take a piece of paper and write down the 5 <u>world-wide brands</u> you believe are the most successful (well-known, most powerful, most valuable) today.

Most Powerful World-wide Brand Rankings (Millward Brown)

- 1. Apple
- 2. Google
- 3. IBM
- 4. McDonald's
- 5. Microsoft
- 6. Coca Cola
- 7. AT & T
- 8. Marlboro
- 9. China Mobile
- 10. GE

Benefits of effective Branding

- Customers are attracted to stronger brands.
- A strong brand can be sold at a higher premium price and is therefore a very successful way to escape price competition.
- A strong brand attracts loyal, repeat customers and maximizes the effectiveness of your marketing efforts.
- <u>A strong brand increases profits</u> over the long term, enhancing the overall company value.

Brands that survive bring great value

"The most successful brands are simple, clear, passionate and convincing."

Daniel Workman

Employee Ownership Management

In 1847, John Deere promised

"I will never put my name on a product that does not have in it the best that is in me."

VJS Construction

• Brand promise:

"We deliver an exceptional building experience by creating trusting partnerships with our customers, providing them with dedicated personal attention, quality workmanship, and innovative construction services."

• Their slogan: *"You can Build on that"*

Other Brand Promises

- **Toyota** "Delivering quality and reliability in all our products." (was there a disconnect somewhere?)
- Wal-Mart Was: "Always low prices" Now is: "Save Money, Live Better" (Does it work?)

• GE "Better living"

(as expressed through (too?) many tag lines for over a century)

- "Live better electrically"
- "Progress through people"
- "Progress is our most important product"
- "We bring good things to life"

Well-known employee-owned Brands

Employee-owned Brand Promises

- Southwest Airlines: "The low-fare airline", "Grab your bag, It's on!"
- Whole Foods: "Locally grown" (Local means green, preserving character, diversity and quality, 'greening up' local economies)
- SAIC: "Delivering knowledge management to private and public sector organizations."

In addition to the Brand Promise we need to ...

- Develop a Value Proposition
- Identify your target customers and audiences via research
- Position your brand to reach your target customers
- Create logos, taglines, advertising creation, media placement, sales plans, sales materials, etc.

Let's explore Value Propositions...

A Value Proposition

- <u>Is an internal document that helps companies</u> <u>"position" themselves</u> with customers by identifying key benefits that meet current & prospective customer needs.
- Presents <u>additional reasons that differentiate</u> <u>your products and/or services</u> from the competition.
- It answers the customer question—

"Why should I buy your brand?"

Sources: Kotler on Marketing, Marketing Insights from A to Z, Phillip Kotler

Employee Ownership Management

An Example of a Value Proposition

- Volvo builds cars with you in mind:
 - Over time, this commitment grew into three core Volvo values: safety, quality and environmental care.
 - Today, these values define our approach to product development, design and production.
 - While remaining faithful to these core values, Volvo has decisively moved to create a family of automobiles that advance an entire industry in safety, performance and design.

W. L. Gore: An employee-owned Value Proposition example

- The Gore family of consumer products, including our revolutionary GORE-TEX® fabric, is designed to provide superior performance in a wide range of applications.
- If it says "Gore" on the label, you can count on the very best in outerwear, guitar strings, vacuum cleaner bags, cast liners, pipe bags, and more.
- WINDSTOPPER® Outerwear combines durable wind protection and high breathability in garments that keep you warm and comfortable with fewer layers and less bulk. keep you warm and comfortable with fewer layers and less bulk.

Value Proposition "benefits"

• Products

- Quality
- Performance
- Reliability
- Durability
- Safety
- Fastest
- Best value for \$
- Most prestigious
- Best designed
- Easiest to use

Services

- Quality
- Performance
- Best value for \$
- Most prestigious
- convenient
- Most responsive
- Most trustworthy
- Most empathetic
- Make it tangible

Avoid Value Propositions that result in:

- Under positioning—no central benefit or strong reason to buy
- Over positioning—A narrow look that some customers may overlook
- Confused Positioning—Claiming two or more benefits that contradict each other
- Irrelevant Positioning—Claiming a benefit few customers care about.
- Doubtful Positioning—Claiming a benefit people doubt you can actually deliver

Source: Kotler on Marketing, Phillip Kotler Employee Ownership Management

Confused Positioning—or was it?

- In 1920, 18th amendment (Volstead Act) enacted—prohibiting alcohol sales and consumption
- Napa Valley grapes were processed into raisin cakes with the warning "Caution: will ferment and turn into wine."
- Napa Valley grape production increased 10-fold between 1920 and 1933—how 'bout those raisins?
- Source: Wall Street Journal, April 7, 2005

Customers perceptions of value can tell you whether you are positioned correctly

Summarizing so far: We can compete by...

- <u>Collaborating</u> with our customers.
- Building and sustaining our <u>Brand</u>
- Understanding and delivering on our "<u>Brand</u> <u>Promise</u>"
- Identifying our targets and <u>Positioning</u> our brand
- Creating and communicating our <u>Value</u> <u>Proposition</u> via marketing and sales.

Does employee ownership enhance value to customers?

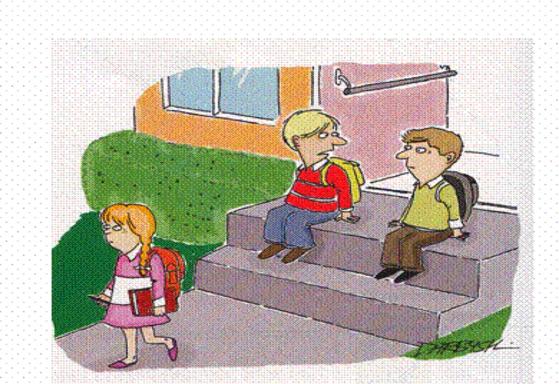

- Ownership by: Potential Advantage
 - Family
 - Employees
 - Customers
 - Stockholders

- Family pride
- I, we give better service
- We own & support you
- More robust resources

Your challenge today:

- Draft your Company's Value Proposition using the worksheet inside your binder.
- <u>Consider</u>:
 - What are the <u>specific costs and other things your</u> <u>buyers consider and want</u> when thinking about buying your products or services?
 - Does being employee-owned differentiate your company from the competition with customers?
 - --What "benefits" come from employee ownership that translate into value for the customers?

How well will your Value Proposition work?

"Everyone offers to carry her books—you need a better value proposition."

41

Final thoughts.

- Marketing is key to cultivating and keeping customers for life.
- A market-driven culture is essential for survival and growth and a "natural" extension of an employee-owned culture..
- You may be able to use employee ownership in a Value Proposition for your external and internal customers and sales staff to enhance marketing.
- Talk to the customers (internal, external). *Listen to what they have to say—eliminate the "So Whats."*

Your "take away"

- Take a piece of paper and complete this sentence.
 - "Based on what I learned today, when I get back to the workplace, I'm going to:

"
